VALORA CEO & CTO TO SPEAK AT COMPUTER FORENSICS SHOW

Sandra Serkes and Aaron Goodisman selected to speak about **Innovations in E-Discovery** and the **State of Documents** throughout the litigation process.

Burlington, MA - September 30, 2009 - Both Sandra Serkes and Aaron Goodisman, CEO and CTO of Valora Technologies, will speak at the Computer Forensics Show in Santa Clara, CA on October 6th. Their presentations cover common practice in litigation document management, as well as emerging concepts and technologies in electronic data discovery and early case assessment.

With over 20 years in the industry, Ms. Serkes was tapped to give her views on recent innovations in e-discovery. In her presentation "Electronic Data is not Paper Data; Innovation in E-Discovery," Ms. Serkes will share her knowledge on how working with electronic data offers unique opportunities, as well as logistical challenges, compared to more traditional paper-based discovery.

With over 20 years of experience in enterprise-class software architecture and product development, Aaron Goodisman is well equipped to give his presentation "A Document State is not Constant Throughout the Litigation Process." Drawing from his extensive experience and several patents for automated document processing, Mr. Goodisman will discuss his ideas and innovations on using technology to track and predict document characteristics throughout the litigation lifecycle.

Ms. Serkes and Mr. Goodisman were selected as presenters from a large pool of industry experts, based on the strength of their white papers and experience. For more information about them or to arrange a conversation or presentation, please visit www.valoratech.com/management.html. To preview their presentations, please visit www.valoratech.com/presentations.html, and enter "innovation" into the space provided.

About Valora Technologies, Inc.

Valora is a technology-based provider of automated document analytics, processing and review services for the legal and records retention industries. Valora offers services for paper and electronic populations to government agencies, law firms, corporate legal departments and litigation support organizations around the world.

#

Valora has developed a strong expertise in the planning, management, analysis and processing of both large and small cases with short deadlines. The company's specialty is providing efficiency, organization and cost control. In its profile of Valora, The American Lawyer magazine noted: "[Valora] gets the profession closer to something truly overdue - the semiautomated review of litigation documents." For more information on Valora, please visit <http://www.valoratech.com>.

Valora is a privately-held, woman-owned corporation, with headquarters in Burlington, MA.

About The Computer Forensics Show

Billed as the "Don't miss event of the year for all litigation, accounting, and IT professionals," the Computer Forensics Show consists of two days of exhibits, presentations, and panel discussions by some of the industry's leading experts. The show focuses on topics of interest to legal, risk management professionals and addresses key issues about the litigation support industry and computer forensics practice.

The Computer Forensics Show assembles leading minds and operational experts in the industry to inform IT professionals already familiar with computer forensics about industry developments, technology advances and trends. For individuals and companies currently not familiar with computer forensics, The Computer Forensics Show addresses issues that organizations need to be aware of to help prepare for potential litigation and manage document storage and management problem areas.
